Sustainable Timber Tasmania releases Three Year Wood Production Plan for community feedback

Sustainable Timber Tasmania has released the annual update to its Three Year Wood Production Plan 2026-2027 to 2028-2029 to the Tasmanian community for feedback.

The Three Year Wood Production Plan can be accessed on Sustainable Timber Tasmania's website at www.sttas.com.au

The Three Year Plan identifies forest coupes in Tasmania's public production forests that are available across a three-year period from which a schedule of harvesting, roading and regeneration operations will be developed.

The release of the Three Year Plan provides the community with an opportunity to identify which forest coupes and future operations may be of interest to them. Inviting community feedback on the Plan is part of Sustainable Timber Tasmania's commitment to engaging with local stakeholders. Feedback will then be considered during detailed operational planning and decision making processes.

Sustainable Timber Tasmania encourages the community to:

- **Visit** www.sttas.com.au
- **Read** the Three Year Wood Production Plan
- **View** the Access Map to identify which forest coupes may be of interest to them
- **Contact** Sustainable Timber Tasmania with their feedback at stakeholder@sttas.com.au or (03) 6169 2800

The Three Year Plan is developed from modelling and spatial data and includes coupe names, provisional coupe sizes (not final harvest boundaries), location coordinates, anticipated harvest type and method, and an estimation of anticipated volumes of log products for potential recovery.

The Plan contains a significant amount of information, so to make it easier for people to read and understand, a spatial layer is developed and available to view on a map of Tasmania. This can be viewed on the Access Map on Sustainable Timber Tasmania's website at <https://sttas.com.au/forests-you/access-map>

It's important to understand that not all forest coupes listed in the Three Year Plan will be harvested, and final harvesting and regeneration details for each coupe may be different from what is listed in the Plan. This is because Sustainable Timber Tasmania has not yet undertaken detailed operational planning for each coupe.

Please note: A list of frequently asked questions regarding the Three Year Plan has been made available for reading on Sustainable Timber Tasmania's website at www.sttas.com.au
